

A CHOICE OF SECURITY.

GO—
SECURITYDOOR

THE EVOLUTION OF PROTECTION.

Go is the maximum evolution in security doors, which today is available to you. The quality of the materials, the innovation of the technology and patents, the international certification guarantee, make Go the solid assurance that you can be sure to count on. Forever. GO's internal structure is constructed of single sheet galvanised steel with vertical reinforcing ribs and is equipped with a Block type deviator. The Go doors are certified burglar-proof in class 2 in compliance with the ENV 1627 European standard. The double bit locks put their trust in the international patent MIA, which allows endless substitutions of the key without having to change the lock. Simply replace the standard neutral block with another that is supplied with a new set of keys.

All models can be personalised with these finish panels:

STAINED CHERRY WOOD C1

BEECH F1

LACQUERED RAL 9010 WHITE

MEDIUM MAHOGANY M1
